5. Strategic planning feedback - Ryan
6. Picnic shelter update - Melanie
7. Holiday Events
  - a. Parade route update
  - b. Volunteer sign up – Charlie
8. Sports grants discussion
9. Property tour Debrief
10. Bike park project
11. Items to take to Town Council
12. Action item review
13. Board Member comments
14. Adjournment

# BICYCLE PLAYGROUNDS

There's a special bond between kids and bikes that can never be broken. Riding a bike is a rite of passage, a passport to worlds beyond the front lawn. Bikes represent fun, freedom, and fresh air - everything that's good about being a kid. Moreover, biking is a healthy pastime that kids will never outgrow.

# WHAT IS A PUMPTRACK?

A Pumptrack is a progressive kind of structure that uses an up and down 'pumping' motion to propel the bicycle forward instead of pedaling.

Pumptracks are a perfect structure for practicing balance, learning skills and improving confidence on the bike. They are safe and fun to ride for all ages and skill levels. Pumptracks are suitable for bikes of all sizes, skateboards, rollerblades and scooters.

They create a community environment by bridging the generation gap between parents, small children and adolescents. Our structures are modular, flexible and movable to suit any type of terrain and land usage issues and can be made from various kinds of materials to suit the needs of the client and the surroundings.

## CHECK OUT OUR LINEUP!

### Lumberjack Series

The Lumberjack series has a substructure that is made from a marine grade lumber and is topped with our ultra grip composite surface. This surface has a texture to it that means that you can ride no matter what Mother Nature throws at you. Because of the modular design it can easily be rearranged or added to at anytime. This line is ideal for indoor settings, mobile setups, resorts, and bike shops. It is easily stored, setup, and transported.

### Blacksmith Series

The Blacksmith Series is built with the same galvanized steel that we use on our park and trail features. The framework has a powder-coat finish for extra protection and is laser cut for precision, and repeatability. It is topped with the same ultra grip composite surface as the Lumberjack Series and comes with a 10 year warranty. It can be permanently installed or installed for temporary portable use. This line is ideal for re-purposing a tennis court, parking lot, or any other hard surface. It can also be dropped into a field, any park, or in conjunction with a skatepark. Because of the modular design it can easily be rearranged or added to at anytime. Perfect for municipalities, resorts, events, or bike shops.

### Mason Series

The Mason Series is constructed with high strength precast concrete. We manufacture these structures using precision molds that give you a perfect shape and riding surface. Each piece is the exact same size and shape as the Lumberjack and Blacksmith Series, meaning you get the same amazing ride in a more permanent aesthetically pleasing manner. The Mason Series can be used for repurposing a tennis court, parking lot or any other pad, or it can be placed as a standalone feature with added landscaping. While it is more difficult the Mason Series can be added to or reconfigured at a later date. The Mason Series is perfect for any municipality or resort that is looking for a worry free progressive biking structure.

## Speed Ring

The Speed Ring is the entry level smallest possible track to build with only one possible layout. It is a great "starter" track as it can be added to over the years to become a larger track. This is a perfect track to learn how to ride pumptrack, or fine-tune your skills. Track Length 125'

\$27,500

\$35,000

\$45,000

## Triple Threat

You will have a blast flying around the Triple Threat with its three 60 degree turns and equilateral triangle design. The speed you get from this configuration is where the real fun is at. Ride the Triple Threat clockwise or counter-clockwise to see which direction you are faster. Track Length 158'

\$33,000

\$42,000

\$54,000

## Sidewinder

The Sidewinder delivers turning in both directions and offers multiple layout possibilities with over 200' of track. The Sidewinder is a great track for improving your agility in the corners. Track Length 215'

\$53,000

\$67,000

\$86,000

## Mach 6

The Mach 6 is a pumped up version of The Sidewinder containing 6 berms, over 100' more of track and multiple configurations. Host a time trial and post the fastest times on our facebook page to see how your riders compare to others around the globe. Track Length 330'

\$74,500

\$94,500

\$121,500

## Grand Prix

The name really says it all, as the Grand Prix is the largest package we offer (of course if you want bigger we will be happy to oblige) being longer than a football field yet compact enough to fit in a 115'x88' space. The Grand Prix has numerous layout possibilities and enough parts to create two of our smaller tracks for head-to-head racing. Track Length 440'

\$97,500

\$124,000

\$159,000

## SLAUGHTER PEN GATEWAY TRAIL

*SCOPE OF SERVICES:* Build and Install Snake Ladder bridge 50' long, and Split Decision Ladder Bridge 60' long

*PROJECT COMPLETION:* August 2012
